

Dario Bartesaghi

Born in Milan on December 15, 1950

Mobile: +39. 335.7898370

I have in my portfolio over 20 years of experience, dedicated to developing products designed to prevent thefts, first of all the Meck Lock mechanical/hydraulic anti-theft system, discovered in the early 90's and brought to the attention of national and international markets from then until today.

The product distribution was carried out initially through the company Scarico Srl, of which I was the General Manager and later by the company Fichter Milano Srl, of which I was partner and shareholder together with Mrs. Sutto Silvia.

From 1998 to 2009, the Meck Lock anti-theft system was distributed and produced by the company Meck Lock System Italia Srl, where I was Partner, shareholder, and CEO while Mrs. Sutto Silvia always worked with me as Export Manager.

And now I'd like to introduce you to our new company.

New initiatives coming from the market have forced us to continue to develop the product to meet the growing market demands that has meant we have continued to improve the product for twenty years. This has meant new technical solutions for vehicles and in particular for earth moving machines safety.

From this desire came **Mechanical Line Solutions Srl**, whose owners and shareholders are, once again, Dario Bartesaghi and Sutto Silvia.

The security sector has evolved over the years and also the **mechanical/hydraulic anti-theft** products produced today with our new company, **Mechanical Solutions**, which has undergone some important changes and improvements, always with the same purpose: **TO STOP THEFT OF VEHICLES**.

This job is still very exciting for us and we look forward to the next 20 years of providing innovative security systems that will meet the high demands of our customers. It has proved difficult to get where we are but we have risen to these challenges and are now a stronger company moving forward.

MECHANICAL LINE SOLUTIONS SRL
